## SUMMARY

**As you read in my resume, I am a fresher and ready with my skills to work in an organization or company. I believe all these skills and education are just one part of our career until we work with all these on a professional platform. By making projects I am gaining my knowledge to find out my mistakes and improving them. Although I have no work experience but still I found that my time management, punctuation and projects experience will help me to become a better candidate than others. Also, I declare that all the information written above are correct with my concern.**
